Background

KinnexA is a vibrant and innovative state of the art manufacturer of high speed connectors. Offering advanced products featuring compatibility with competitor product lines at exceptional value and quality for networking, automobile, telecom and consumer electronics.

- **KinnexA, Inc.** ■ Taipei, Taiwan
- **Mission:** Developing and manufacturing state-of-the-art connector and industry solutions for our customers.
- **Established:** July, 2001
- **Capital Size:** \$ 4,700,000
- **Core Products:** Wired/Wireless High Speed Connectors
- **Work Force:** 60 Engineers, R&D, Sales & Marketing, and support personnel headquartered in Taiwan with 1500 personnel in China

Company Milestone

Founding: 2001, Taipei, Taiwan

Emerging Milestones:

- **2008** KinnexA became 1st Taiwanese Ethernet Connector supplier to Dell Enterprise Server history
- **2009** The 1st Taiwanese 10G RJ45 supplier.
- **2010** Qualified by Intel to be a supplier
- **2013** Launched RJ45 with integrated PHY to authorize TYCO
- **2014** Recognized and awarded Broadcom CDM partner of the year
- **2015** Launched the 8K superMHL connector, partnering with superMHL Consortium
- **2016** Developed 40G RJ45 aiming to be the 1st one in the world.
- **2017** Developed 67GHz RF connector to be the 1st one in the world

Focus Market

- . Networking/Cloud Computing
- . Networking IC Suppliers
- . OCP3.0 Devices
- . Industry Computers and Automobile
- . 3C Products
- . 5G and IoT (Internet of Things)

KinnexA Innovative Products

1

Ethernet

- 10G RJ45

- Integrated PHY

- Discrete Module

- 2.5G/5G RJ45

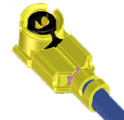

2

RF

- MRF

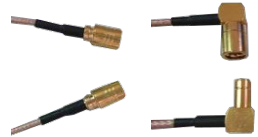

- MRF Jump Wire

- SMA

- SMB

- FAKRA

3

High Speed

- SuperMHL

- SFP/QSFP

- USB C Type

RJ45 01F/04F Series for OCP3.0

PRODUCT FEATURES:

- ✚ Low profile package for OCP NIC 3.0
- ✚ Compliant with IEEE 802.3 standard
- ✚ Qualified with top 1G/10G PHY manufacturers
- ✚ RoHS peak temperature per IPC/JEDEC J-STD-020C
- ✚ Fine tuned magnetics to specific PHY vendors

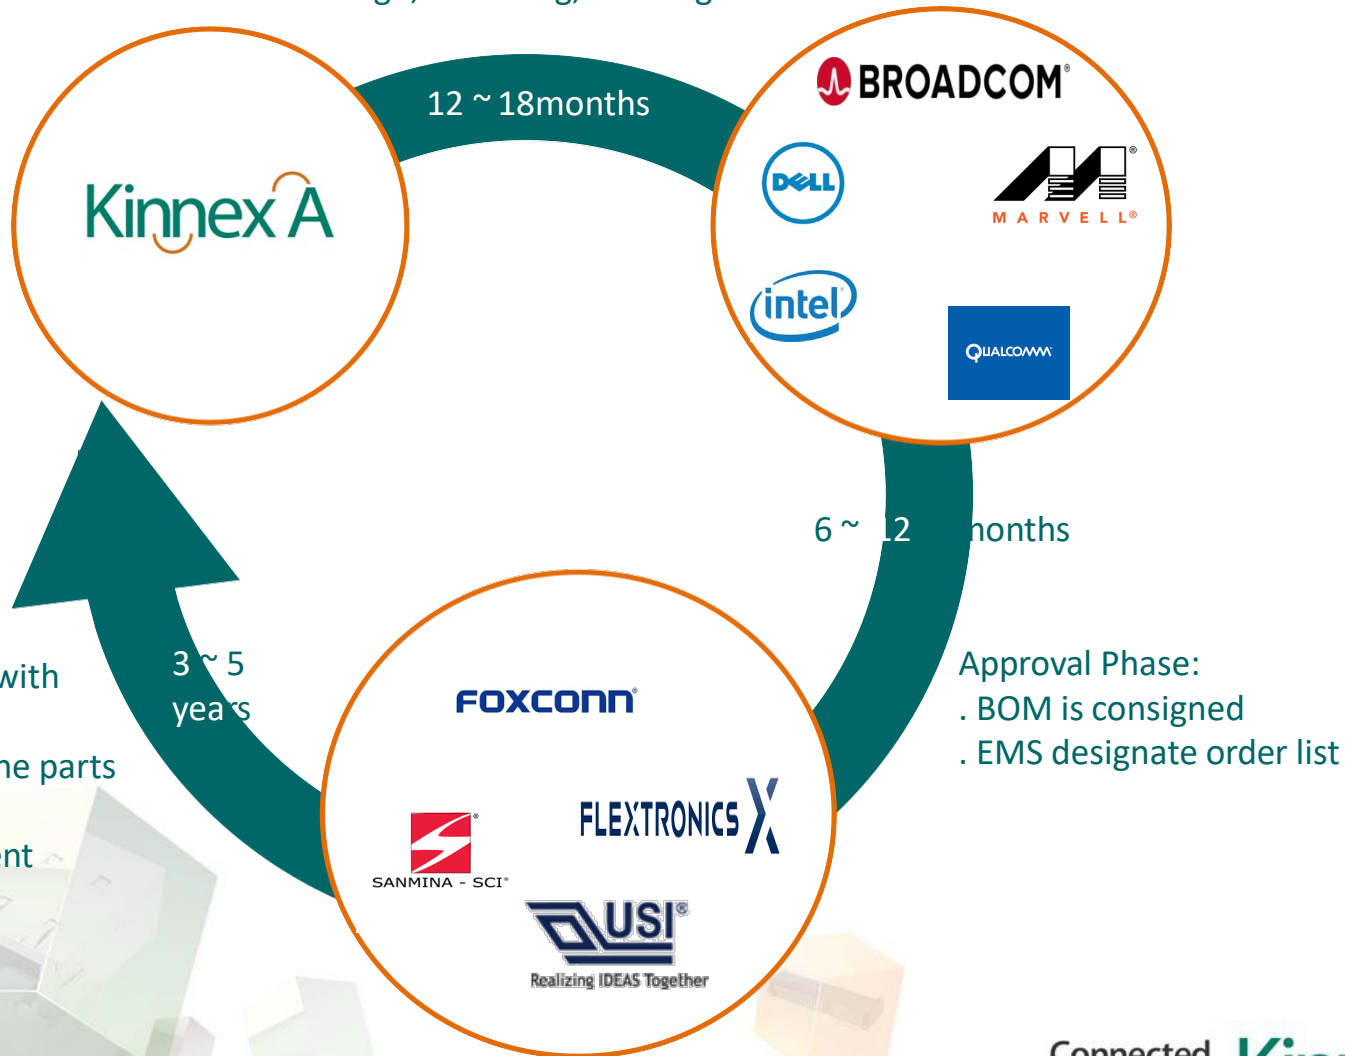

KRH-01F Series

KRH-04F Series

Business Model

KinnexA develops projects with customer on
1.Design, 2. Tooling, 3.Testing

Our Vision

Taking advantage to expand the capacity

- 1. 100% owned factory and 3 sub-contract factories
- 2. To place precision high end production facilities in Southern Taiwan to facilitate cost effective production

Extend the supply chain to increase product range

- 1. Strategically partner with technical universities
- 2. Continuous development of high speed products
- 3. Expand our product line for wire/wireless application for future products.

Reduce cost to offer good prices

- Automate production to reduce the cost resulting in being able to offer the best value and competitive pricing to our customers.

Create Win-Win Partnership

- Working with IC supplier to formulate the specification as to offer more diversified products to end customers, which will result in a mutually beneficial business relationship.

Recruitment of talented personnel

- To continue recruiting talented engineering, R&D, and support personnel to join KinnexA's team for sustainable human resources and design growth.
